Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

***Claim Rejections - 35 USC § 112***

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 18-23 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. Claims 18-23, are rejected under 112 1<sup>st</sup>, for the limitations “providing by the hub the intercepted message to a PIN entry device communicatively coupled to the hub, the PIN entry device being different from a keyboard associated with the host processing device”. There is not disclosed in the specification, “providing by the hub the intercepted message to a PIN entry device communicatively coupled to the hub, the PIN entry device being different from a keyboard associated with the host processing device”. The specification on page 31, discloses, the data entry device may prompt the user for data input. The message is transmitted from the data entry device to the hub(pg. 31). There is no disclosure that a pin entry device pin is not entered through the keyboard.

***Reasons for Allowance***

3. Claims 18-23 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action. Claims 18-23 are allowable because of, “intercepting by a hub messages from the host addressed to the token”, and also, “providing by the hub the intercepted message to a PIN entry device communicatively coupled to the hub, the PIN entry device being different from a keyboard associated with the host

processing device". Prior art in security, tokens/smartcards fails to disclose or suggested the limitations above. In the prior art of security and networking, prior art fails to disclose or suggest, a USB hub intercepting a message and redirecting it to a different USB device to which the message was originally addressed. Furthermore, in the prior art of tokens or dongles, the dongle is inserted in the port, and smartcard can also be used with the dongle but the pin is entered from the keyboard not from a separate entry device.
